

Huntingdon County Conservation District

2025 Tree/Seedling Sale

ORDER DEADLINE

Friday, April 4th, 2025

“To be without trees would, in the most literal way, to be without our roots.” - Richard Mabey

To our customers,

The Huntingdon County Conservation District (HCCD) is excited to announce the 2025 Huntingdon County Tree/Seedling Sale! We look forward to providing you with another successful tree sale event. The HCCD has proudly served the community since 1955 and we strive to continue to conserve, manage, and protect the county's natural resources. Trees offer numerous benefits and planting them is an easy and fun way to improve our environment!

Our catalog contains many trees that are favorable for erosion control, shade, windbreaks, Christmas trees, landscaping, and wildlife habitat.

ALL PROCEEDS from the annual tree/seedling sale help to fund our educational outreach programs.

Cordially yours,

Huntingdon County Conservation District

10605 Raystown Road

Huntingdon, PA 16652

(814)627-1626

<https://huntingdoncd.egovpayments.com/egov/apps/payment/center.egov>

Questions? Contact the HCCD at (814) 627-1626

EVERGREEN SEEDLINGS

Norway Spruce (*Picea abies*)

- Valued ornamental and timber tree.
 - One of the best conifers for windbreaks and wildlife cover.
 - Dense, dark green, 1" needles.
 - Reach heights of 80-100'.
 - Fast growth rate.
 - Prefers full sun.
 - Tolerates wet soil, but grows best in loamy, well-drained areas.
-
- 2-yr old seedlings | 10-18 inches
 - 1 bundle = **15 seedlings/\$15.00**

Douglas Fir (*Pseudotsuga menziesii*)

- Native to the Pacific Northwest and Rocky Mountain region.
 - One of the most popular Christmas tree varieties.
 - Needles are $\frac{3}{4}$ -1 $\frac{1}{4}$ inches long, soft and fragrant.
 - Can reach heights up to 250 feet.
 - Fast growth rate.
 - Grows best in full sun, tolerant of partial sun.
 - Grows best in well-drained soils, not tolerant of wet or compacted soils.
-
- 2-yr old seedlings | 10-18 inches
 - 1 bundle = **15 seedlings/\$15.00**

DECIDUOUS SEEDLINGS

American Chestnut-Hybrid (*Castanea dentata x mollissima*)

- The American-Chinese hybrid species were bred by The American Chestnut Foundation.
 - Tree is resistant to chestnut blight.
 - Can reach heights up to 100 feet.
 - Moderate growth rate.
 - Grows best in full sun.
 - Grows best in dry, sandy or rocky soils.
 - Customers are encouraged to pot seedlings for 1 growing season prior to planting in the ground!
-
- 1-yr old seedlings | 8-10 inches
 - 1 bundle = **2 seedlings/\$10.00**
 - **Limit of 1 bundle per customer!**

Northern Red Oak (*Quercus rubra*)

- Highly valued wildlife and timber tree species.
 - Acorns consumed by wildlife, including deer, turkey, and squirrels.
 - Produce acorns around 30 years old.
 - Fall foliage is a vibrant red.
 - Typical heights reach 60-70 feet.
 - Moderate-fast growth rate.
 - Grows best in full sun and partial sun.
 - Grows best in moist, well-drained soils.
-
- 2-yr old seedlings | 8-16 inches
 - 1 bundle = **10 seedlings/\$12.00**

DECIDUOUS SEEDLINGS

American Cranberry (*Viburnum trilobum*)

- Produces small, edible fruits that resemble cranberries and are consumed by wildlife and people.
- Plants begin to produce fruit at 5 years old.
- Not a “true” cranberry, but rather a *Viburnum* shrub.
- Can reach heights of 8–15 feet.
- Fast growth rate.
- Grows best in full sun or partial sun.
- Grows in a variety of soil conditions.

- 4-yr old seedlings | 8–16 inches
- 1 bundle = **10 seedlings/\$15.00**

River Birch (*Betula nigra*)

- Often found growing along waterways.
- Great for erosion control and popular ornamental tree.
- Easily identified by its attractive, “paper-like” bark.
- Fall foliage is yellow.
- Can reach heights of 60–80 feet.
- Fast growth rate.
- Prefers full sun to partial shade.
- Grows best in moist to wet soils.

- 4-yr old seedlings | 12–24 inches
- 1 bundle = **10 seedlings/\$12.00**

DECIDUOUS SEEDLINGS

Nannyberry / Sheepberry (*Viburnum lentago*)

- Short-growing tree that produces small, white flowers that bloom in late may
 - Dark green leaves turn brick red in fall.
 - Produces edible berries great for jams or jellies, birds enjoy them in the winter!
 - Can reach heights of 15–18 feet, with a moderate growth rate
 - Grows best in full sun or partial sun, also a great wetland variety!
-
- 5–yr old seedlings, 3-5 feet
 - 1 bundle = **10 seedlings/\$15.00**

Gray Dogwood (*Cornus racemosa*)

- Short-growing deciduous shrub.
 - Flowers bloom in early summer.
 - Produces small, white berries favored by songbirds.
 - Often planted along waterways and other wet areas.
 - Provides shelter for songbirds and small mammals.
 - Can reach heights of 4–15 feet.
 - Fast growth rate.
 - Prefers full sun to partial shade.
 - Grows in a variety of soil conditions.
-
- 4–yr old seedlings, 12–24 inches
 - 1 bundle = **10 seedlings/\$12.00**

SOIL TEST KIT

Test kit includes directions on collection and mailing soil sample.

Sample is mailed to Penn State for processing, and a report is mailed back to you in approximately 7-10 days.

Soil test kits can also be purchased at any Penn State Extension office.

1 Soil Test Kit = **\$9.00/kit**

Tips for Successfully Growing Bare-root Seedlings

What is a bare-root seedling?

- Bare-root seedlings are 1-3 year old nursery stock that are dug, stored, and shipped WITHOUT soil or potting mix surrounding the roots.
- Seedlings can either be planted directly in the ground or grown in pots and planted at a later date!

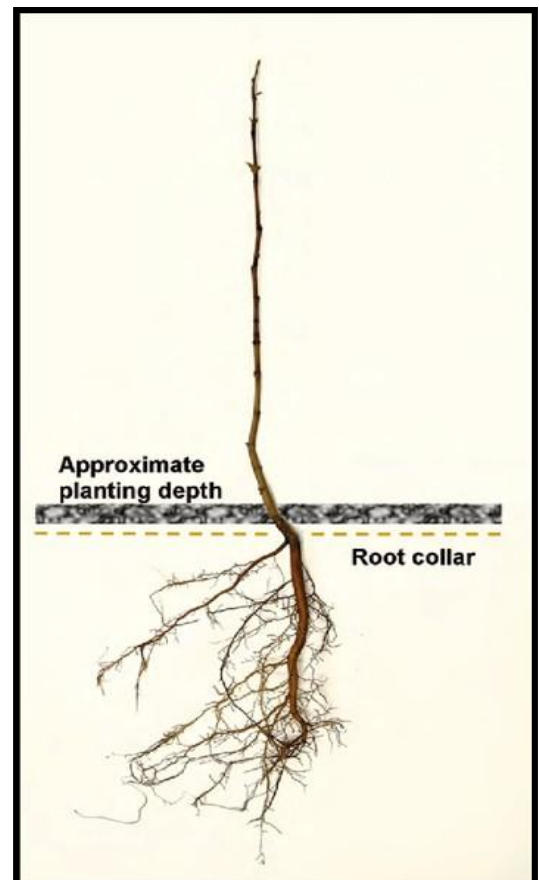

Before planting:

- DO NOT allow the seedling roots to dry out. The HCCD dips the roots in a moisture absorbent root-gel to ensure seedling survival until pick-up.
- If not planted the same day as pick-up, store plants in a cool, shaded place such as a garage, basement, refrigerator, etc.

During and after planting:

- For best results, plant between March 1st through May 31st.
- Be cognizant of weather. Successive periods of freezing and thawing can damage newly planted seedlings.
- Place tree in hole and ensure roots are completely covered and compacted with soil.
- If possible, water regularly during the first growing season.
- If deer are abundant, utilize tree protectors to prevent animal damage.

District Disclaimer

- Seedling quantities are LIMITED, all sales are on a **first come first serve basis.**
- All seedlings are bare-root stock.
- Species availability varies year to year depending on the nursery. Therefore, District sale prices may also vary year-to-year.
- Although we primarily try to offer native species, we do include some nonnative species in our sale. We do not offer any known invasive species in our sale.
- All seedlings are guaranteed live at delivery.
- Plants **not picked up by the pick-up dates** are NOT the responsibility of the Conservation District.
- The District does not have control over seedlings once they are picked up, therefore, we accept no responsibility and cannot guarantee survival.
